What is Medicare For All (HR 676)

Everybody In, Nobody Out - Gives every resident of the United States and the U.S. Territories access to all medically necessary health care services, including vision and dental, with no copays or deductibles regardless of employment, income or health status.

Non-Profit Health Care - Converts all healthcare providers to a not-for-profit service where illness is no longer a source of wealth for a few.

Single Payer - Pays for that expanded coverage by maintaining the present level of federal and state funding for Health Care as well as turning the premiums now paid to private medical insurance companies into Medicare For All premiums.

ONE LESS WOE TO WORRY ABOUT

Lift every voice and sing...Oh say can you see...Oh beautiful, for spacious skies, for amber waves of grain...America, freedom, equality and human rights have been wrapped up in song that those of us who proudly reside as citizens in these United States have cling to with great dignity since each song was penned.

Also, when we think we've rested on our laurels or that others have attempted to break our collective spirit by trampling on that which represents America or those who have sacrificed their very existence for all that is America we retaliate with dynamism containing the nucleus of our forefathers.

The molding of this great country, at its beginnings, was fought hardest for by our forefathers when it needed its most nurturing and even longer and harder by those of us whom America has shown its most injustice toward instead of divine gratitude so, yes, we retaliate vigorously.

Of those of us whom the Statue of Liberty's poem was inscribed for during that period in America's history and those of us who have come here since - of their own choosing, who have yet to become citizens, should not only know that they are welcomed, but be made to feel that they are welcomed as well. After all, the majority of us were once them.

It is common knowledge that there is strength in numbers and the more Americans willing to fight the good fight the more auspicious the country.

Right now so many of us are suffering and trying to make our way through hard times that we have no choice, but to do what makes sense and that is fighting the good fight, of which there are many however, in the context of this leaflet, the good fight is singular - HR-676...and in singing this new song of "America" to celebrate its triumph over adversity, let health care be one less woe to worry about.
